veriseal,

have sent both SEAL team and authentiseal site information on a captain artiga, and investigation of abuse and torture of iraqis by the group that brought the world ABU ghraib. you should've have done your home work..wrong name and other information was intentionally sent to you and you made faulty assumptions without once contacting me. legal counsel will be contacting your organisation to establish your legal counsel.

christmas present: photos and statements of abused and tortured iraqis are being collated presently. in addition, no investigation was done BY C.I.D or any other organisation. as stated by these very same groups, but not to worry three federal agencies are now investigating thoroughly, in addition: all three medical reviewers have stated that they knew "medevac" was a sham to cover-up reported abuse..have your legal counsel ready.

f.g. ford n.d.
